Rail Freight:
A system in competition

Dr. Dirk Stahl, CEO BLS Cargo AG
Rail Freight: A system in competition

Global Rail Freight Conference; 06/23/16

Dr. Dirk Stahl, CEO BLS Cargo AG
Profile of BLS Cargo

- Service provider on the central north-south corridor «rhine-alpine» through Switzerland.
- Provision of transport services for Swiss national, import and export freight traffic.
- Founded 2001. Shareholders (97% BLS; 3% Ambrogio Group)
- Key figures 2015
  - turnover CHF 171 mill.;
  - profit CHF 0.3 mill.
  - 18 225 trains
  - 2.5 Mrd. tkm; 10 Mio. t
  - 30% share of Swiss transalpine freight market (Gotthard: 11%; Lötschberg: 53%)
Differentiation for the benefit of the customers

- ambitious
- based on partnership
- specialist for the Alpine Corridor
- reliable
- customer orientated
- innovative

Dirk Stahl, CEO BLS Cargo
Best products and services for the customers

BLS Cargo focuses on cross-boarder operations in order to increase competitiveness. New infrastructures create potential chances for rail freight vs. road

- Fleet of about 50 multi-system locos. Freshly arrived new locos Re 475 DACHINL for corridor “Rhine-Alpine” in order to cope with future growth and replacement of older locos.
- Cross-Border production concepts of BLS Cargo need seamless and interoperable infrastructure and harmonised processes
- Customers to be served end-to-end with full responsibility of BLS Cargo
- Gotthard-Basetunnel. Preparation of BLS Cargo to run trains in 2016. Increase of efficiency and productivity from 2021, because of works on the whole axis (4-m-corridor, Ceneri-Basetunnel).
Oil price, strong swiss franc, complexity of rail

Towards road there are critical success factors. Above all low oil price and a high complexity of the rail system
Regulation

As from BLS Cargo, the following issues have to be solved

- Reduction of regulations in rail freight with benchmark road. Consistent european solutions and regulations in order to replace national rules.
- Harmonised licence procedures for locos and drivers.
- Harmonised infrastructure access rules and infrastructure charges.
- Fair level playing field rail/road, regarding external costs
- Fair usage of infrastructure capacity between passenger and freight
